PRESS RELEASE

Herkimer County Public Health received word on Friday August 28, 2020, from Wadsworth Labs that a kitten that was sent in to be tested for rabies on Thursday August 27, 2020 from the City of Little Falls has tested positive for rabies.

The kitten was found outside the residence with some wounds, euthanized and sent to Wadsworth lab for testing.

The public can protect themselves or their family pets from rabies by practicing the following:

1. Vaccinate your pets against rabies
2. Spay or neuter all animals to reduce the number of strays.
3. Do not feed strays or handle unknown animals, wild or domestic.

Remind children and adults not to play with unknown animals (wild or domestic). If a bat is found in a house, and there is a possibility it had contact with a person or an animal in the house, call Public Health and we will make arrangements to have the bat tested, if necessary.

Herkimer County Public Health would like to remind the public to please check your pet’s rabies vaccination records to make sure that they are up to date. If they are not up to date, make an appointment with their vet as soon as possible to have them vaccinated against rabies.

Please call Public Health at 315-867-1176, if you have any questions, or concerns. Please visit our web site www.herkimercounty.org.
